" 18 " " " " ... 70s.	80s.	100s.
" 19 " " " " ...		

They are all fitted with Universal Winch Fittings, Steel Revolving Head Rings, and can be made with Spliced or Ferruled Joints; also, if wished, can have Spring Fasteners, without any increase on the prices quoted.

India Rubber Buttons, 2s. 6d. extra.

Any of the above Rods with Revolving Rings, 20s. extra.

Every care and attention is given in selecting the wood used for the above Rods, and none is used in extra-finished unless it has been in stock four years.

Orders by post receive immediate attention, and in all cases letters and orders are promptly acknowledged.

C. FARLOW & Co., Ltd., 191, STRAND, W.C.

3

SALMON RODS.

(Special Patterns.)

TRAHERNE RODS.

17-ft. 4-in. Salmon Rods kept in Stock, exact to Major Traherne's Pattern, as made by us, and described in the "Badminton Library on Salmon and Trout." £4 each. We have built a great many Rods on the same lines as the above, lighter in weight, suitable for gentlemen who cannot use so powerful a Rod.

We also keep Rods made to Major Traherne's Light Salmon or Grilse Rod, 16-ft. long, which is found to be most useful when the water is low, and where fine tackle and small flies are required, £3 5s. each.

The above Rods are made with Spliced or Ferruled Fittings.

"FARLOW'S" PREPARED SPLICING TAPE.

To Anglers using Spliced Rods our Prepared Splicing Tape is invaluable. A spliced rod can be put together as quickly as a ferruled rod, and, in case of a fracture, is the greatest boon ever invented. No angler should be without it. Is worth enough for a Salmon Rod.

If possible, during the cold weather, slightly warm the Tape before splicing and tie the ends down with thread.

India Rubber Buttons, 2s. 6d. extra.

Engraving initials carefully executed, and is strongly recommended as a means of identification, in block letters, 6d. per letter.

Orders by post receive immediate attention, and in all cases letters and orders are promptly acknowledged.

LIGHT SALMON or GRILSE RODS.

We are now making Light Salmon Rods, 15 feet long, specially for ladies. They are powerful, and quite able to kill large fish. We strongly recommend them for ladies or gentlemen who cannot use heavy Rods. Balance and action carefully studied.

In three pieces, spare top and top case.

Upright Rings, Steel Revolving Head Rings.

Price £3 3s.

As long lines are necessary for Salmon, Bronzed Brass Reels for the above are somewhat heavy. We therefore recommend them made of Aluminium.

4 in., correct size, £3 5s. Leather case, 11/- extra.
40 yards Double Taper and 60 yards Back Line, suitable for Rod, 18/4.

THE "FRANCIS FRANCIS" ROD.

Double Handed Trout or May Fly Rod, recommended by the late Francis Francis, Esq.; also useful for Lake or White Trout Fishing; made of Greenheart, in 3 joints, 14 ft. long, £2 10s.

FARLOW'S PERFECT CORK HANDLE GREENHEART LADIES' SALMON RODS.

They are made in 3 pieces, 14 ft. and 15 ft. The grips of these Rods are made of solid cork, thereby dispensing with the wood that is usually left for the grip. The cork handle has a hole bored through it to receive the butt, which is the same size under the cork as above the grip. Consequently the play is continued to the winch, thereby giving greater casting power than ordinary Rods of the same length.

The great advantage of the cork grip is that these Rods are considerably lighter than the ordinary Salmon Rods, as will be seen from the weights below.

Upright Rings and Steel Revolving Head Rings.

14 feet Rods weigh about 24 ozs. Price £2 15s.

15 " " " " 29 " £3 5s.

The Reel recommended for the 14 ft. Rod, size 3 1/4 inches, weighs 10 1/2 ozs. Price £3.

For the 15 ft. Rod, size 4 inches, weighs 12 ozs. Price £3 5s.

These Reels are made of Alloyed Aluminium.

For Cases, see page 19.

LINES (Suitable):

40 yds. Double Taper Prepared Silk (Solid) 13/4 and 60 yds. Hemp Back Line, Spliced to above, 5/-

EXTRACT FROM "BADMINTON LIBRARY ON SALMON AND TROUT."

Major Traherne writes:-

"I have tried all sorts and sizes of rods, by various makers, but the one I am now using, and have used for many years, is, to my mind, perfection. It is a greenheart, in two splices, made by Farlow, and, if a rod is to be judged by its power of casting, it should be a good one.

"It is the one with which I won the first prize at the Fishing Tournament at Hendon, in July, 1884, for the longest overhead cast, with a cast of 45 yards 1 inch. To cast a long line a rod requires great lifting power, and my rod possesses this quality to a great extent, although, at the same time, it is not heavy enough to tire one in a hard day's fishing.

"I am at a loss how to describe it, but its virtue lies in an equal distribution of strength, in proportion, from the butt to the point.

"A heavy butt, with no spring to it and with a weak top, is of little use for casting purposes beyond a certain distance. The spring should be felt, to a certain extent, to the bottom of the butt when casting; and I consider a rod which does not possess this quality of little or no value.

"'Castle Connell' rods are made on this principle, but, in my opinion, they are too top-heavy. If they had a little less weight at the top and more in the butt I think they

would be pleasanter to fish with, and would lose nothing in power. They will, doubtless, cast as long a line as rods of other descriptions, but, owing to their being so thin at the butt and so top-heavy, it often happens that when throwing a long line in a gale of wind they are apt to smash just above the reel. I fished with these rods for years, but, for this reason, I discarded them. They are, however, very powerful rods, and well suited to the Shannon, where the fish run very heavy, and a powerful rod is required; and, as all fishing is done out of a boat on that river, long casting is unnecessary.

"Every rod requires a line to suit it; and it will be as well to bear in mind, when making a choice of one, that a rod with a weak, whippy top, is not suitable for casting thick lines, and a stiff, or more powerful rod, is not adapted for casting a thin line. The best wood for a rod is green or brown-heart. It is very light and pleasant to fish with. The only drawback is that rods made of it will sometimes smash at a moment's notice without any apparent cause.

"I have sent my favourite rod to Farlow's, and should anyone wish to try one made on the same lines he will be able to obtain it at that establishment. In choosing a rod, a novice will walk, as it were, blindfolded into a fishing-tackle maker's shop and generally order the biggest rod he can get, and of a calibre which will tire him in half an hour. A big rod seems to be a necessity to him; and a gentle hint from an older angler that the rod is rather too heavy is not often taken in good part. It is only by bitter experience that he will find out his mistake.

"If fishing-tackle manufacturers would but 'take stock' of their customers, and recommend the beginner to choose a rod which will be found suitable to his strength, it would be no loss to them, and would save a great deal of disappointment. It would, moreover, start the novice in the right road to success; whereas, if he begins fishing with a big rod that is over his strength he will have probably to toil and labour for weeks before he can make a decent cast, which he might have succeeded in accomplishing in a day or two if he had taken a friend's advice.

"A 17-foot rod is quite long enough for any ordinary casting for salmon, provided it is of sufficient power. A 16-foot rod is long enough for peel or grisle fishing, or even for salmon, when the water is low, and where fine tackle and small flies are required.

"Anyone who has read the reports of the Casting Tournaments at Hendon, will see what marvellous casts were made with 16-foot rods; but they must be made of good stuff, with plenty of lifting power.

"Fishermen of any experience will, of course, select a rod to suit their own fancy; but I strongly recommend the novice to make his first effort with a rod under his strength, and, above all things, to avoid using one with a weak, whippy top.

The art of rod-making has been brought to great perfection in America. The split-cane rods are marvellous works of art, and are being much used in this country; but they are very expensive, and, as I cannot discover any particular advantage they possess over our old-fashioned English-made rods, I prefer to use the latter.

SPLIT CANE SALMON RODS.

Split Cane Salmon Rods, with every modern improvement; they are all steel centred, Lockfast fittings, Snake Rings, Solid Cork Grips, and revolving top end Rings; nothing but the choicest Cane is used, the ferrules are serrated, and the tongues have a metal receiver, which quite prevents sticking, and also gives additional strength, without adding any perceptible weight. Each Rod is fitted with our Universal Winch Fittings (as recommended in the Badminton Library by H. Cholmondeley-Pennell, Esq.)

THE "FIVE"

SPLIT CANE LIGHT SALMON OR GRILSE ROD.

IN THREE PIECES.

Steel centred. Made in two lengths, 14 feet and 15 feet.

For ladies or gentlemen who cannot use heavy Rods; they are constructed in balance and action on the most improved principles, they have also been thoroughly tested, and found to be quite powerful enough for most Salmon rivers.

We have been able to produce these Rods considerably lighter than formerly, without any reduction in strength, and can confidently recommend them.

They are fitted with cork handles and lock-fast joints.

The 14 feet Rod weighs about $22\frac{1}{2}$ ozs.

	" 15 "	" "	" 25 "	
Price, 14 feet Rod	£7 0 0.
" 15 "	£8 0 0.

For the 14 feet Rod, correct size, Alloyed Aluminium Patent Reel, weight $10\frac{1}{2}$ ozs., $3\frac{3}{4}$ inches. Price £3 0 0.

Ditto, 15 feet Rod, weight 12 ozs., 4 inches. Price £3 5 0.

Each Reel is capable of holding 40 yards Double Taper Prepared Line and 60 yards of Back Line, the correct size for Rod. Price 18/4.

For Reel Cases see page 19.

SPLIT CANE TROUT RODS.

With every modern improvement—snake rings lockfast fittings, universal winch fittings, cork grips, revolving head rings, and serrated ferrules; the tongues have metal receivers, which quite prevents sticking, without any perceptible weight.

perceptible weight.		£	s.	d.

THE "PERFECT" CORK HANDLE GREENHEART
TROUT ROD.

They are made in 2 and 3 pieces, varying in lengths from 9ft. to 11ft., the length found to be most useful is 10ft. 6 in. The grips of these Rods are made of solid cork, thereby dispensing with the wood that is usually left for the grip, the cork handle has a hole bored through it to receive the butt, which is the same size under the cork as above the grip, consequently the play is continued to the winch, thereby giving greater casting power than ordinary Rods of the same length.

The great advantage of the cork grip is that these Rods are considerably lighter than the ordinary trout rods, as will be seen from the weights below; the weights were taken from Rods selected indiscriminately from stock.

Weights of 3 piece Rods.

Wood Grips.		Cork Grips.	
9 ft. ..	10½ ozs.	9 ft. ..	8½ ozs.
10 ft. ..	13 ozs.	10 ft. ..	10 ozs.
10 ft. 6 in. ..	13½ ozs.	10 ft. 6 in. ..	10½ ozs.
11 ft. ..	14 ozs.	11 ft. ..	11 ozs.

They are made with straight metal ferrules, thereby reducing to a minimum the chances of throwing out when casting. They can be made lighter if wished, but the weights given are for really useful, fairly powerful Rods.

Lengths kept in Stock.

9 ft., 10 ft., 10 ft.	in., and 11 ft., 2 pieces, 2 tops,	
and top case £2 10s. each
8 pieces, 2 tops, and top case £2 5s. "

Extract from "Badminton Library" on Tarpon Fishing.

ALFRED C. HARMSWORTH, Esq., writes:—

"Capturing a Tarpon—though only a ten-pounder—on one of Farlow's light greenheart trout rods is a feat upon which I pride myself."

Orders by post receive immediate attention, and in all cases letters and orders are promptly acknowledged.

Tarpon Rods and Tackle kept in stock.

All orders must be accompanied with a remittance or reference in town.

ROD BOXES.

[illegible]

Initials painted on lid, gratis. We strongly recommend this to be done, as it assists the owner in identifying when travelling.
The 3½ in. by 4 in. will hold 2 Salmon Rods and 2 Trout Rods.
The 4 in. by 4½ in. 4

The 4 in. by 4 in. will hold 2 Salmon Rods and 2 Trout Rods.
The 4 in. by 4½ in. " " " " " "

These Rod Boxes are made of White Wood varnished, bound with iron clamps at each end and body, solid brass clamps let in at each end, 2 strong straps outside, also two straps inside to keep rods together, hinges and Bramah lock and key. Oak Boxes made to order.

SOLID LEATHER ROD CASES

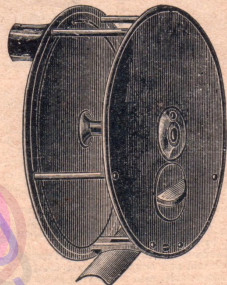

These cases are made of thick stout leather, of the very best quality, and in the larger sizes the straps of two hides are used, which are sewn in the centre, and thus insure strength and stability. They each have two strong straps for attaching or securing them when travelling, the strap connected with the cap is made with two haps, so that it may be lengthened 8 inches, if necessary. They will each take about 4 rods, being 4 inches less than after at first.

The above are kept in stock, any other size made to order.

OUR NEW PATENT LEVER SALMON WINCH

Can be regulated to any stiffness at will.

This Winch is designed to effect an adjustable check upon the revolving plate, so that resistance, the power of which can be graduated at will, may be offered to the running out of the line.

The regulating screw is on the outside of the plate of the winch, which can be easily turned with the fingers to produce or lessen the amount of pressure required. They are made in the following sizes with the usual ratchet check:-

Inches ...	3½	3¾	4	4½	4¾	5
	42/6	45/-	50/-	55/-	60/-	70/-

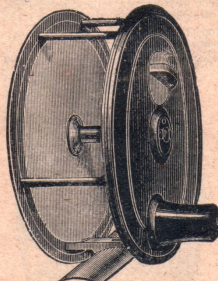

Leather Cases for ditto, see page 19.

Engraving Initials carefully executed, and is strongly recommended as a means of identification, in block letters, 6d. per letter.

Orders by post receive immediate attention, and in all cases letters and orders are promptly acknowledged.

ALUMINIUM PATENT LEVER SALMON WINCH.

Made of Alloyed Aluminium. Can be regulated to any stiffness at will. The Alloy used in these reels so hardens the Aluminium that they will stand hard work quite as well as brass, and, as will be seen by the weights, are much lighter.

Size in inches ...	3½	3¾	4	4½	4¾	5
Weights ...	9 ozs.	10½ ozs.	12 ozs.	13½ ozs.	14½ ozs.	16 ozs.

Leather Cases for ditto (see page 19).

Extract from "The Salmon Fly."

GEO. M. KILSON, Esq., writes:-

A lengthy correspondence took place, relating principally to details in the construction of the *Lever*, with the result that a Winch was patented, and to this day is sold at 191, Strand, under the name of "The Patent Lever Winch." The neat and skilful way in which the work has been executed, and this establishment is in every way a source of satisfaction to me, and a transport of delight to all my friends.

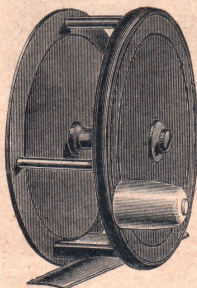

Nearly 2,000 of these Winches are in use.

Please drop a little oil in the holes marked oil on back and front of reel. Engraving Initials carefully executed, and is strongly recommended as a means of identification, in block letters, 6d. per letter.

BEST LONDON MADE BRONZED WINCHES.

This Winch is made of the best possible material, each plate is well hummered to harden it before being turned, the interior mechanism is of superior quality steel, carefully tempered and adjusted, the handle is ivory and lined with hard metal, so that it works without any friction and cannot wear no matter how much it may be used, it is fixed on the revolving plate, which quite prevents the line being caught.

They have stood the test of years, and we guarantee them to be trustworthy, practical Winches.

Inches	2	2½	2¾	3	3½	3¾	4	4½	4¾	5
	21/-	27/-	31/-	35/-	40/-	45/-	50/-	55/-	60/-	63/-

EBONITE WINCHES.

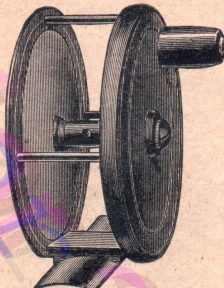

For LIGHT FLY RODS.

We keep these Winches in three sizes, 2½ in., 2¾ in., and 3 in. They average 2 ozs. each, lighter than the best London Bronzed Winches. Prices the same.

All orders must be accompanied with a remittance or reference in 10/6.

FARLOW'S COLLAPSIBLE LINE DRIER.

Regs. No. 79,016.
A Machine for effectually drying Lines when wet, made so that the air passes freely through to every portion of the Line, and so dries and preserves it. Each Winder is fitted with a Screw Clamp, so that it may be screwed on any table. This Clamp is arched to receive the scoop of Winch, which can

be placed or removed at will, so that the Machine need not be unscrewed after once fixing. The great advantage gained in using this Winder is that it entirely prevents the kinking of the Line, as is usually the case in the old method of winding the Line round the backs of chairs, &c. Price complete, 15s. Packing Case and Postage, 1s. 6d. extra.

DEER FAT.—For preserving Reel Lines. It also makes them buoyant and smooth. 1s. per box. Postage, 2d. extra.

SPECIAL RODS FOR NEW ZEALAND, TASMANIA, & THE COLONIES.

Four-piece 13 ft. and 14 ft. Greenheart Fly and Spinning Rods combined, each rod with two Fly Tops, two Spinning Tops, and Top Case, with Phosphor bronze revolving end rings, and Phosphor bronze revolving ring on Butt, convertible from a Fly Rod into a Spinning Rod. By taking away the small Joint and Fly-top, and substituting a stiff Top to fit in the large Joint, will make the 13 ft. Rod about 10 ft., an excellent Rod for Bait and Spinning, and the same to a 14 ft. Rod will make a 10 ft. 6 in. for Bait and Spinning.

We have supplied a great many of these Rods for Colonial fishing, and they are universally liked where gentlemen do not care to carry more than one Rod, and yet must spin, &c., for the larger Fish; they are specially built for this work, and are capable of killing heavy fish.

£3 10s. each. Best quality.

3½ Best Bronzed Winch	£1 10 0.
60 yards Waterproof Line	0 15 0.

Suitable for Spinning or Fly Fishing.

TROUT FISHING IN NEW ZEALAND AND TASMANIA.

We have a thorough knowledge of the Tackle required for New Zealand and Tasmania, having a very large connection amongst colonists who want first-class Fishing Tackle.

Three Rods are required for a complete outfit:— £ s. d.
3 piece 14ft. Greenheart, ex. finished, 2 fly tops and 1 short top ... 2 15 0 each.
3 " 11ft. Greenheart, ex. finished, 2 fly tops ... 2 2 0 "
3 " 12ft. Greenheart, extra finished, spinning rod, 2 tops ... £2 10 0 and 3 0 0 "

Or—
4 piece 14ft. Greenheart, ex. finished, 2 fly tops and 1 short top ... 3 0 0 "
4 " 11ft. Greenheart, ex. finished, 2 fly tops ... 2 2 0 "
4 " 12ft. or 13ft., Greenheart, extra finished, spinning rod, 2 tops ... £2 10 0 and 3 0 0 "

We also keep these Rods made in Split Cane, hexagonal built. These Rods are made more powerful than are used generally, as the fish run large and play grandly.

For the 14ft. Fly Rod—
A 3; Winch, £1 10s. 0d., and 60 yards Waterproof Silk Line, 15s. 0d.

For the 11ft. Fly Rod—
A 2; Winch, £1 1s. 0d., and 40 yards Waterproof Silk Line, 10s. 0d.

For the 12ft. Spinning Rod—
A 3; Winch, £1 10s. 0d., and 60 yards Waterproof Silk Line, 15s. 0d.

Flies vary in size according to the rivers to be fished. We have a complete set of patterns.

3s. and 2s. per doz. on Gut.
3s. 6d. and 2s. 6d. per doz. on Eyed Hooks.
Casts should be taken in three sizes—
Lake Trout Casts, 1s. 6d. each.
Stout Trout Casts, 1s. each, or 10s. doz.
Fine Trout Casts, 1s. each, or 10s. doz.

The Trout in New Zealand do not, as a rule, take the Fly above 11lb.— seldom that weight. The larger fish are taken by spinning Baits, Grasshopper, and Cricket (Cicada) Fishing. Baits used are Whitebait Phantoms, Devons, and we have made for General Hogge a Rubber Phantom, which he has used with much success in New Zealand. Bait Hooks are also required for Creeper and Grub Fishing; these, in rapid water, are very deadly.

Traces should be in two sizes—
Salmon Gut, 2s. each. Fine Salmon Gut, 2s. each.
An assortment of leads most essential. Live Baiting with the Bull Head or Smelt is much practised; a single hook is all that is required, passed through both lips.

TASMANIA.

For Tasmania we have a set of pattern flies, &c., supplied to us by J. A. Douglas, Esq., and described by him in the *Field*, Jan. 18, 1890. Rods, Reels, and Lines same as for New Zealand.

FISHING IN ALL PARTS OF THE WORLD.

We have for inspection a list of Tackle that has been supplied by us for fishing in nearly every part of the globe. Tackle has been supplied to sportsmen fishing in Assam, The Argentine Republic, British Guiana, British Columbia, Burmah, Bermuda, Ceylon, California (a large connection), Central Africa (Uganda), Colorado, Canada (a speciality), Cape Town, China, Canary Islands, Deccan, Dambe (Lower), Egypt (Nile), Fiji Islands, France (all parts), Geneva, Germany (Black Forest), Italy, Iceland (splendid trout fishing free), Jamaica, Kashmir, Matabeleland, Natal, Newfoundland, Orange Free State, Oregon, Persia, Smyrna, South America (Buenos Ayres and River Plate), Switzerland, St. Helena, San Francisco (splendid fishing), Transvaal, Vancouver (grand fishing).

FLORIDA.

Outfits for Tarpon a speciality.

NORWAY, SWEDEN, AND FINLAND.

We have great experience and knowledge of the Tackle required for Norway and Sweden, and can supply the correct Rods, Reels, Lines, Flies, Baits, &c., that should be used, our business with anglers in those countries being very extensive.

SWEDEN.

We have the patterns of Flies, sizes of Baits, &c., recommended by Sir Henry Pottinger, Bart., Capt. Wade Browne, and many other gentlemen.

ICELAND.

We have the patterns of Salmon Flies, sizes, &c., recommended by the Rev. B. Darley, who has fished the country many years.

"CORBET" SALMON CASTS.

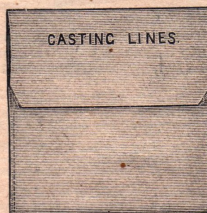

Invented by REGINALD CORBET, jun., Esq.

These Casts are made of Treble Gut; three distinct single Casts are made, and then twisted together by hand so that the *strain* must be equally divided, the knots not coming in the same place; they have been given most severe tests, and we thoroughly recommend them.

Have been used on the Alten and other rivers in Norway by many well-known Anglers.

2 yards long each 5/-

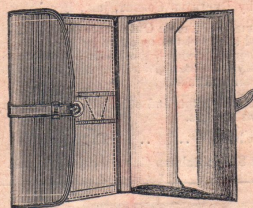

With 1 yard best Single Salmon Gut attached, 7/6 each.

**CHAMOIS LEATHER CAST POUCH.**

Made in two sizes for Salmon and Trout Casts.

The natural grease moisture of the Chamois Leather protects and preserves the suppleness of Gut, and for keeping Casts or Gut of any kind is invaluable.

2/-	Salmon size. 5½ inches square.
1/6	Trout " 4½ " "

THE "COMPACT" CAST BOOK.

Made with best Pigskin Cover, and Pocket each end. The interior contains six Chamois Leather pockets (each separated by a leaf of parchment), for holding Gut and Casts.

Invaluable for the purpose, as the natural grease moisture of the Chamois prevents

Gut from getting brittle.

For storing Gut during the winter it is indispensable. 6½ inches long, 6 inches wide, with leather strap. £1 each. See letter from *Fishing Gazette*, April 23rd, 1898:—

CHAMOIS LEATHER AS A GUT PRESERVATIVE.

DEAR SIR,—The following personal experiences of "Chamois Leather as a Gut Preservative" may possibly be of interest to some of your readers:—

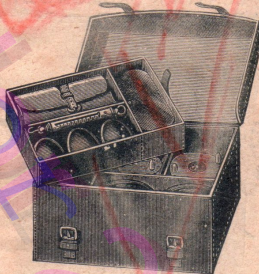

In 1890, while turning out an old cabinet (which had been warehoused since '87) I came across some fine salmon casts; two or three of these were wrapped in a piece of chamois leather, the others lying loose on the shelf.

On testing these casts, I was surprised to find that, while the latter were more or less rotten, and practically useless, the former (those in the leather) were perfectly sound.

It occurred to me that perhaps there might be some natural grease or oil in the skin which preserved the gut. As an experiment, I made myself a pouch, with half a dozen pockets to hold casts.

I have used this pouch, and another made for trout casts, for the past four seasons; during that time I have never lost a fish from rotten gut. I may mention that last season I used casts that had been doing duty at intervals for three or four seasons, and that one of the original fine salmon casts I "bagged a brace" of fish weighing 23 lb. and 22 lb. last "back-end." I see that "Farlow" has brought out a pouch of a similar kind this season. My advice to those who do not care to make their own is—"get one."

UNIQUE.

"HOLD ALL" TACKLE CASE.

Black Enamelled Leather Cloth, constructed to hold Winches, Books, &c., 13 inches long, 10 inches wide, 6 inches deep. Bottom of Box, 3 inches deep, divided in three. Tray, 2½ inches deep divided in three. Lined with green baize, two straps to fasten, and strong handle for carrying. 22s. 6d. each.

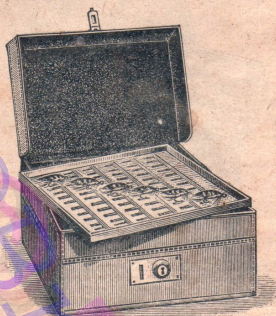

Stamping initials, 6d. per letter, and is strongly recommended as a means of identification.

SALMON "HOLD ALL" CASE

Black Enamelled Leather Cloth as above, 19 inches long, 12½ inches wide, 9½ inches deep. Bottom of Case divided in 4 compartments, each 6 inches wide, 6 inches long, 5 inches deep; and one Compartment, 6 inches wide, 11½ inches long, 5 inches deep; one open Tray, over all, 5 inches deep; two straps, with handle, lock and key. 23s. each.

Superior Solid Leather, £4 10s. each.

Orders by post receive immediate attention, and in all cases letters and orders are promptly acknowledged.

SOLID LEATHER SALMON FLY CASE.
A HANDSOME AND MOST USEFUL PRESENT.

Made of the best Leather procurable, lined with Velvet, and hand sewn throughout. The case is supported by a strong metal frame, and fitted with a secure lever lock, also leather handle to carry.

The Case contains 6 Oak Trays, fitted with metal clips (rustless).

3 Trays, with 5 rows of clips.

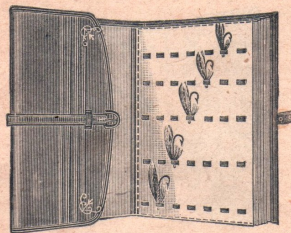

3 " " 6 " "

Each row will take 11 flies; the 6 trays will hold in all 363 flies. Outside measurements:-

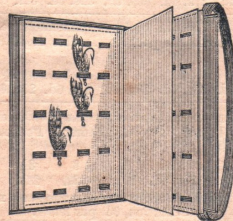

13 inches long, 10 inches wide, 6½ inches deep.

Price £5 5 0.

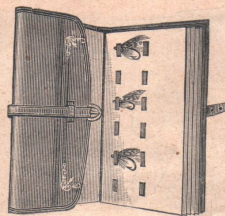

Stamping Coronet, Crest, Monogram, or Initials executed at the shortest notice.

THE "VIVIAN" SALMON FLY MAGAZINE.

Pigskin Covers, 10 Parchment Leaves. Made in two sizes.
12 in. long by 10 in. wide. 10½ in. long by 8½ in. wide.
Will hold 800 Flies. £5 each. Will hold 700 Flies. £4 each.

"ECLIPSE" SALMON FLY BOOK FOR THE POCKET.
Designed by Colonel RALPH VIVIAN.

It is made to hold 80 Salmon Flies. Cover is of Pigskin, 7 inches long, 4½ inches wide, very light to carry, and, being made of Pigskin, it is yielding. Weight 2½ ozs. Price 12/6 each. Post 3d. extra.

TROUT FLY BOOK

Designed by Mr. W. E. Pais.

This Fly Book will keep the gut perfectly straight, and allows one fly to be drawn out without interfering with the others. Each page will carry 1 dozen flies. Length, 12 in.; width, 4 in. Roan Leather, £1 each; Russian Leather, £1 8s. each; post, 3d. each extra.

THE "FRANCIS" TROUT FLY BOOK.

This Book contains the names of 31 most useful patterns, arranged according to the seasons in which they ought to be used, and with full printed instructions. 12 in. long, 4 in. wide. Roan, 10s.; Russia, 12s.; post, 3d. each extra. With one fly of each pattern sewn in, 10s. extra.
30 patterns are 2s. per dozen. 2 patterns are 5s. per dozen.

THE "BICKERDYKE" DOUBLE-HOOK SALMON FLY.

For *Salmo Irregularis*, or Short Rising Fish.
Has been used with great success in Canada, also for Sea Trout in Norway.

Can be made any pattern, same prices as on ordinary double hooks.

"John Bickerdyke" writes in *Days in Thule with Rod, Gun, and Camera*:—"To rise ten salmon in a day without landing one would make any fisherman dissatisfied with his tackle and himself. I came to the conclusion that ordinary salmon flies were of little use for *Salmo Irregularis*, and that for him something specially diabolical must be devised. Clearly the hook should project beyond the tail of the fly so far that if the fish seized only the tip of the wing, the point of the hook would be within his mouth; therefore the hook must be small in the bend, though long in the shank, and not unnecessarily heavy in the wire." These hooks are made in the following lengths:—

Inches—2, 1½, 1¼, 1, ¾.

Plain Eyed Hooks, any size, without Flies, 3s. 6d. dozen.

"In five days' fishing, when using the long-shanked, small-bend, double hooks, I touched eleven fish and landed ten—a result which is, of course, not impossible with the ordinary single hook, but speaks very well for the new shape."

Patterns recommended by "John Bickerdyke" are Jock Scotts, Doctors, Lions, and Fiery Browns; also strongly recommended for large short-rising Sea Trout.

2/-	" 2/6, 2/6, 3/-, 3/-, 3/6 "				

All patterns marked with Star are kept in stock. Those not priced vary according to dressing.

These illustrations are the exact size of what Flies would be dressed on 4/0, 1/0, and 3 Limerick Hooks, so that customers can judge what size fly a particular hook will make, and so facilitate orders.

STILETTOS.
For opening the loops of Salmon Flies, and undoing knots of Casting Lines. Nickel-Plated, 1s. each.

PENNELL'S SEA TROUT FLIES.

As recommended by H. Cholmondeley Pennell, Esq., in the Badminton Library.

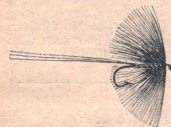

Hackle Claret. Hackle Black.

PENNELL'S BROWN TROUT LAKE FLIES.

Hackle Red. Hackle Yellow.

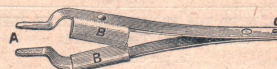

Per dozen, 3s. on Upturn Turn-down Eyed Hooks. We strongly recommend the above for White Trout, Sea Trout, and Lake Trout.

PENNELL'S STREAM TROUT FLIES.

Blue Upright. Red Spinner.
Furnace Brown.

2/6 per dozen.

"EYED FLY GUT CUTTER AND TWEEZERS."

A Tweezers or Pliers. B Cutters. C Hole for String to attach to Button. The combined Gut Cutters and Tweezers, Mr. Cholmondeley-Pennell's (Patent), for cutting off waste gut ends, and extracting Flies from the box, &c., are indispensable for comfort and efficiency in Eyed Hook Fly Fishing. Price, 2s. 6d. each; plated, 3s. 6d. each.

ROLL'D WINGED EYED TROUT FLIES.

These Flies are specially adapted for Dry Fly Fishing, and are much used on chalk streams; the wings being roll'd enables them to float better, and retain their upright position longer. They are now so much used that we stock all the principal Dry Fly patterns on Eyed Hooks. 2s. 6d. per dozen.

DOUBLE SPLIT WINGED EYED TROUT FLIES.

The Wings of these Flies are made of double feathers instead of single, which gives them greater buoyancy than ordinary single winged Flies, and are very effective for Dry Fly Fishing. 2s. 6d. per dozen.

EYED LAKE FLIES.

All the principal patterns kept in stock.
3s. 6d. per dozen.

GUT OR EYED SEA TROUT AND GRILSE FLIES.

Mixed Wings, Topping Tails
5s. per dozen.

Patterns dressed to order same price.

All orders must be accompanied with a remittance or reference in town.

LIST OF TROUT FLIES.

All the above patterns, size 10 and smaller, dressed on the finest Gut, 2s. per dozen, except Red Crow Tag, 3s. per dozen.

A large assortment of Flies, dressed on Eyed Hooks, kept in stock, 2s. 6d. per dozen. Any Patterns dressed to order, same price.

Detached Cork, Rubber, and Gut Bodied May Flies, 5s. per dozen.

Straw Bodied May Flies, 5s. per doz. Wool and Silk ditto 3s. per doz.

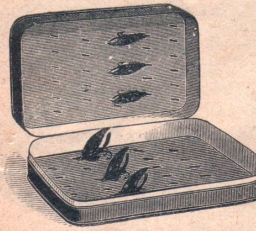

Odourless Paraffin for Dry Fly Fishing, Bottle, and Brush, 1s., postage 3d. extra.

Lake Trout Flies on Gut, 3s. per doz. Sea Trout ditto, 5s. per doz.

Special and Reliable patterns for California, Colorado, Oregon, British Columbia, San Francisco Canada and many other States of North America, on Eyed Hooks, see page 97, size 10 and smaller, 2s. 6d. per dozen. Nos. 8 and 9, 3s. 6d. per dozen. Nos. 5, 6 and 7, 5s. per dozen; on Gut, 2s., 3s., and 4s. 6d. per dozen, same sizes as above. Also made with reinforced loops at head, much liked in America.

DOUBLE HOOK SALMON FLY BOX.

(Invented by G. ASHLEY DODD, Esq.)

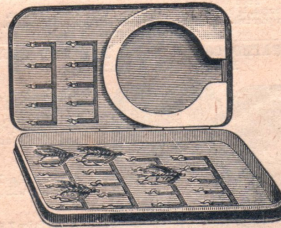

Price, 7s. 6d.; by post, 3d. each extra.

Japanned black outside, lined with cork and fitted with pins inside. Constructed for carrying the Flies required without crushing them. The specks shown are the pins which pass through the loops of the Flies, the points of the hooks sticking into the cork, thus securing the Flies at both ends and preventing them getting out of position.

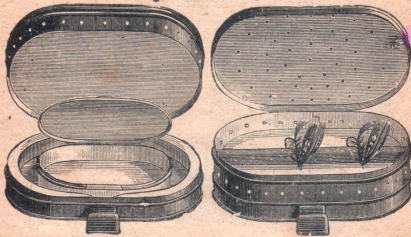

Size 7 in. long by 4 in. wide by 1 1/2 in. deep when closed.

SALMON FLY AND CAST BOX (Patent).

7 in. long, 4 in. wide, 5 in. deep, fitted with German silver springs, will hold 30 Flies. Price 7s. 6d., post 3d. each extra.

Also made without the place for Casts, to hold 40 Salmon Flies, same price.

THE "COMBINATION" SALMON BOX.
Registered No. 82,931.

LOWER PART.

Japanned Black outside, and White Enamel inside. Upper part has a strip of Cork to stick wet Flies in, after use; the sides and lid are perforated to allow the air to freely pass through, and so dry the Flies.

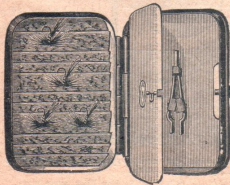

Lower part, the centre box is intended to carry sufficient Flies for a day's use, and the outer space for Casting Lines, which has a rim to prevent the Gut from being cut in closing. Price 10/6; post 3d.

Length, 5 1/2 inches; width, 4 1/2 inches; total depth, 1 1/2 inches.

Upper part inside, 5 inch deep; Lower part inside, 5 inch deep.

"CORRUGATED CORK" EYED FLY AND CAST BOX.

Invented by R. A. BARRIS, Esq.

The bottom of Box is fitted with Cork for holding Eyed Flies, and the Lid for holding Casts and Eyed Gut Cutters and Tweezers.

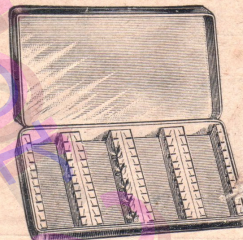

Size 5 inches long full, 3 1/2 inches wide, 1 inch deep.

Price 7/6.

Post 3d. extra.

THE "J.R." FLY BOX

10/19,133 PATENT.

This Box will hold 104 Eyed Flies; it is made of japanned tin black outside, white inside.

To arrange Flies in Box, pass the eye of fly down the metal pin (which is secured by a spiral spring covered in), slip the eye of fly down, then place back into a hole made in the metal covering to receive it, being thus firmly held in an upright position.

Any fly can be easily taken out by the fingers, or a pair of pliers; by drawing the fly away, it slips off the wire pin, which then springs back to its place.

5 1/2 inches long, 3 1/2 inches wide, 5/8 inch deep.

15/6 each.

A smaller size will hold 65 Eyed Flies.

10/6 each.

All orders must be accompanied with a remittance or reference in town.

"ODOURLESS PARAFFIN" for Dry Fly Fishing.

As used by
the Late "Mr. Thomas Andrews,"
the Authority on Fish Culture.

Bottle, Brush, and Oil, complete, 1s. each; post 2d. extra.

THE "TEST" EYED TROUT FLY AND CAST BOX.
Registered No. 91,683.

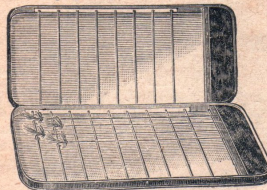

Black Japanned tin outside, white enamel inside, fitted with strips of cork kept in divisions by tin grooves, so that the Wings and Hackles of Flies, when stuck in the cork, lie between the divisions, and prevents crushing or injury to the Flies.

Size—4 in. long; 3½ in. wide; 1 in. deep when closed. Weight—about 6 oz. Will hold 4 to 5 doz. Flies. Caste and Tweepers. Price of box, 8s. 6d. each; Postage 3d. extra. Tweepers, 3s. 6d. each. Ditto, plated, 3s. 6d. each.

Orders by post receive immediate attention, and in all cases letters and orders are promptly acknowledged.

THE "HENRY" FLY BOX.
For Upright Split Wing Flies on Gut.

Japanned black outside, white enamel inside, with pieces of wire across for attaching Flies, and a piece of cork at end to hold the Gut, also piece of Spongio Piline to keep the Gut moist for attaching to Casting Line.

Length, 9 in.; width, 3½ in.; depth, 1 in.; weight, 8½ oz. Price, 8s. 6d. each; Postage, 3d. extra.

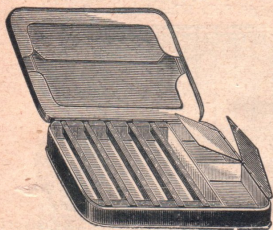

FARLOW'S MOSQUITO AND GNAT PROOF LOTION.

This Lotion has been used in Norway and the Colonies, and has been found thoroughly effective in preventing the attacks of mosquitos and gnats. Each bottle has a screw top, which cannot be lost, but can be unscrewed without detaching and the lotion jerked out.

1s. per Bottle. Postage 2d. extra.

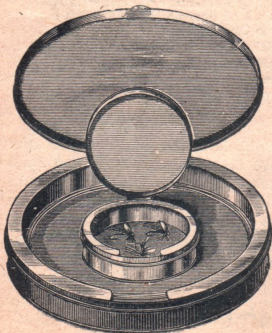

THE "MIDLAND" BOX FOR EYED FLIES AND CASTS.

Invented by A. N. BROWLEY, Esq., Reg. No. 188,849.

Japanned Tin, 4½ in. long, 3½ in. wide, 1 in. deep.

Price 8s. each. Postage 3d. extra.

THE NEW "DOUBLE SAFETY" CAST AND FLY BOX.

Regd. No. 68,057.

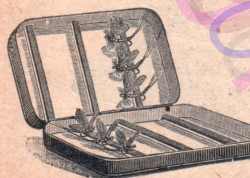

Size, 4½ in. wide, 3 in. deep. 4s. each; postage, 3d. extra.

BOX FOR HOLDING FLIES AND CASTS.

With Flannel Band round Box to wind Wet Casts with Flies on. Price 2s. 6d. each. Postage 3d.

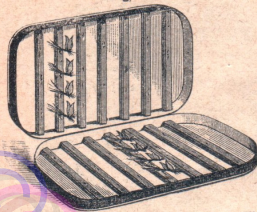

MAY FLY BOX.

Japanned Tin, Black outside, White inside, divided with strips of cork, each piece of cork being supported and fitted in a tin groove to prevent its moving, and to enable the cork to be replaced when worn out.

6 in. long, 3½ in. wide, 1 in. deep. Price 7s. 6d. Postage 3d. extra.

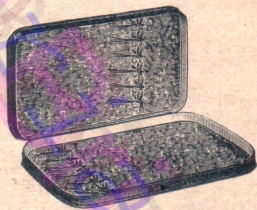

NEW EYED TROUT FLY BOX.
Registered No. 44,533.

Made of Japanned tin, black outside and white inside, divided with strips of cork, each piece of cork being supported and fitted in a tin groove to prevent its moving, and to enable the cork to be replaced when worn out. Weight of box, 6 oz.; length, 6 in.; width, 3 1/2 in.; depth, 1 1/2 in. when closed.

Arranged to hold 7 doz. Flies. The advantages in using this box are that when the Flies are stuck in the cork the Wings and Hackles come between the divisions, and so prevent the Flies from being at all crushed. Price, 8s. 6d. each; postage, 3d. extra.

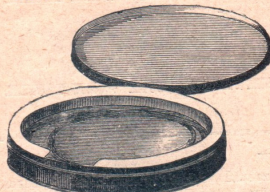

THE "ITCHEN" EYED FLY BOX.

Made of Japanned Tin, black outside, and lined inside with prepared felt. 6 in. long; 3 1/2 in. wide; 1 in. deep. Weighs 5 1/2 ozs.

Price 8s. 6d. each; postage 3d. extra.

RHOADES' "SAFETY" CAST BOX.

Japanned black outside and white enamel inside. Made with a flanged rim, so as to prevent the Casts from being damaged in closing the Box. We draw special attention to this Box as entirely remedying the evil complained of so long in the construction of similar boxes, which cause so much damage to the contents, and highly recommend its use. Sizes—4 1/2 in. wide, 1 1/2 in. deep (Price, 2s. 6d. each; post, 3d. each extra) or 6 in. wide, 1 in. deep.

JAPANNED CAST DAMPER BOX.

With 2 pieces of Sponge Pline for keeping Casts moist, to carry in the pocket.

Sizes—4 1/2 in. wide, 1 1/2 in. deep, and 5 in. wide, 1 1/2 in. deep.

Price—4s. each; Post, 3d. each extra.

PENNELL'S 2-HOOK WORM TACKLE.

STEWART'S 3-HOOK WORM TACKLE.

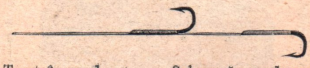

These are made so that the Trout Worm Fisher can attach any size of Gut to his tackle, the top hook being made with a metal eye; the connecting piece of gut between the hooks is fairly rigid, and stained red; also the whippings on hooks are red, to resemble the colour of a worm. This tackle is an immense improvement, which must be evident to practical anglers.

Price 2s. per dozen.

STEWART'S 3-HOOK WORM TACKLE ON GUT.

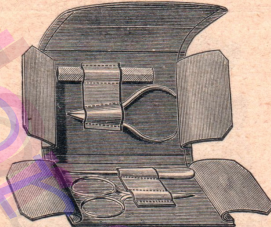

PENNELL'S 2-HOOK WORM TACKLE ON GUT.

Trout, 2s. per dozen.

Salmon, 5s. per dozen.

THE ANGLER'S COMPANION.

Containing Scissors, Stiletto for undoing knots and opening the eyes of Salmon Flies, Pliers, and File for sharpening hooks. In Folding Pockets Leather Case; length when folded, 4 1/2 in.; width when folded, 3 in.

Price complete, 10s. 6d. each; postage, 3d. extra.

We are now receiving many orders for Specimen Fish to be Painted on Wood, shaped to dimensions sent; the correct way to send the dimensions is to place the fish upon a large sheet of paper, trace carefully with a pencil around the fish, so that a correct outline is obtained; then make note of any detail which would be required in the painting, forward to us, and we will return you a correct copy of the fish. The advantage derived is that you retain the fish, and yet have a copy of it, as in the illustration. Prices vary according to size of fish.

THE "PORTMAN" FISHING BAG.

Invented by the Hon. E. W. B. PORTMAN.

Mr. PORTMAN writes:—"The Fishing Bag you made me was far superior to anything I have had before."

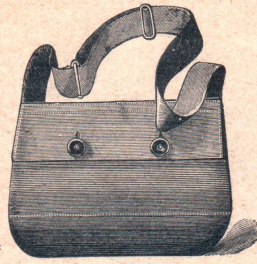

Made of **Tanned** extra stout Waterproof Canvas. The back bag, which is intended to carry fish, is removable, and can be thoroughly cleansed.

The front bag is so arranged that it contains two pockets expanding, attached to the back part, which can be utilized for holding flask, sandwich case, fly box, &c., and the main part is most commodious, also expanding; decidedly a practical and improved Fishing Bag.

19 inches wide, 15 inches deep. Price £1 1 0.

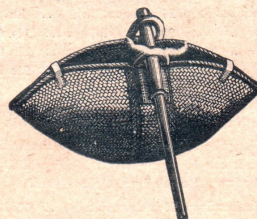

FISHING BAGS.

Sizes. 14 in. wide, 12 in. deep, 7s. 6d. each.
" 16 " " 13 " " 7s. 6d. "
" 18 " " 14 " " 7s. 6d. "

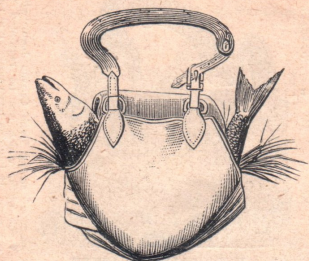

Made of strong Drab Canvas Jean, with Webb's girth, which can be regulated to any size. It has two large pockets and two small pockets.

"USK" SALMON BASKET.

This basket is used by many practical fishermen for carrying Salmon, being light, very strong, and capable of holding large fish. It is very easily carried on the shoulder by a stout stick, which slips through the handles of basket, and resting on a leather pad relieves the shoulder. They are made in two qualities.
14s. and 21s. each, complete; postage, 6d. extra.

WATERPROOF "FREKE" FISHING BAGS.

Size 0.	12 inches deep, 16 inches wide	..	10s. 6d. each
" 1.	14 " " 20 " "	..	12s. 6d. "
" 2.	16 " " 23 " "	..	15s. 0d. "
" 3.	18 " " 28 " "	..	21s. 0d. "

IMPROVED "FREKE."

With removable porous back (Registered).

The advantage of being able to remove the back, or fish bag, so that it can be thoroughly washed, will at once recommend the invention to all practical anglers.

Size 0.	12 inches deep, 16 inches wide	..	15s. 0d. each.
" 1.	14 " " 20 " "	..	18s. 6d. "
" 2.	16 " " 23 " "	..	21s. 0d. "

EXTRA LARGE "FREKE" SALMON BAGS.

Tanned Angola, 18 in. deep, 28 in. wide .. 35s. 0d. each,

THE "GRESHAM" BAG.

Registered No. 249 471.

It is made of Waterproof Sailmakers' Cloth, and yet very light. Will carry any weight up to 40 lb.; it can be washed, can be rolled or folded up for carriage when not in use, can be quickly and securely fastened by means of the cord and metal eyelet holes.

Price, 6s. 6d. each; Post, 3d. extra.
Superior Quality for Salmon Anglers, 12s. 6d.

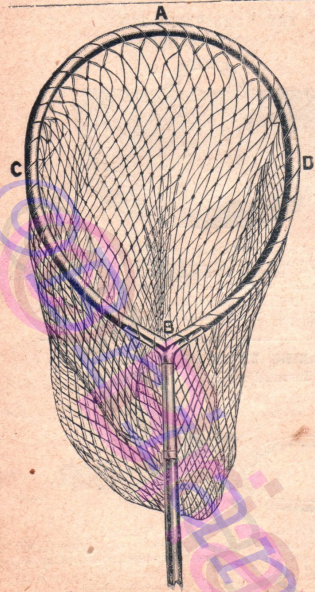

CLEARING KNIFE OR BOUGH CUTTER.

Invented by EARDLEY C. HOLT, Esq.

The diagram is a little less than half-size.
The dotted lines show its position when not required for use.
The *Screw* is the size usually adopted, and will fit any ordinary Gaff or Net handle.

Price, 10s. 6d. each; Plated, 1s. extra.

THE "PRACTICAL" SALMON, GRILSE, OR PIKE LANDING NET.
 Intended for hand use, the net is made of strong twine, waterproofed, with capacious bags. Made in the following sizes—
 A to B .. 19 ft. 6 in. long, 20 inches wide .. £1 7 6
 B to C .. 20 ft. 6 in. long, 20 inches wide .. £1 7 6
 C to D .. 21 ft. 6 in. long, 20 inches wide .. £1 7 6
 D to E .. 22 ft. 6 in. long, 20 inches wide .. £1 7 6
 Lightness consistent with strength. Price includes a strong handle, with specially stout socket, 5 ft. to 5 ft. 6 in. long.

FARLOW'S IMPROVED LANDING NET, BASKET AND GIRTH.

The Improved Folding-joint Landing Handle and Net. Size, when open, 5 ft. long; when closed, about 2 ft. 7 in. long. The above sketch shows how portable the handle is when hooked on the waistband of improved Girth.

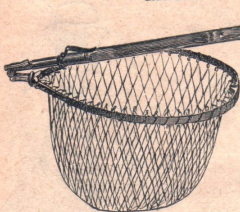

Price 21s., by post 6d. extra.

Our Improved Girth is made to be worn over the left shoulder, with another band round the waist, and so prevents any strain across the chest. Price, 10s. 6d. each.

The position of the "Desideratum" Fishing Basket is also shown and we highly recommend all these articles as being most suitable and useful to a fisherman.

All orders must be accompanied with a remittance or reference in town.

TELESCOPIC HANDLE, SPRING JOINT & COLLAPSING RING & NET.

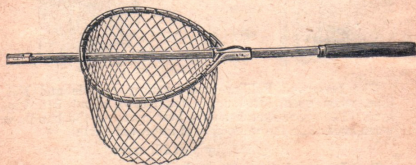

Length of Telescopic Handle in carriage from 2 ft. to 2 ft. 3 in.

Length of Collapsing Net and Telescopic Handle, ready for use, 5 ft. 4 in.

Telescopic Handle, 7/6 each; Joint, 11/- each; Steel Collapsing Ring and Net, 15/- each.

THE IMPROVED "GYE" SLIP LANDING NET.

Invented by His Honor JUDGE PERCY GYE.

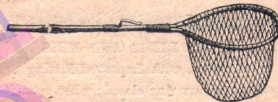

This Trout Net is considered most practical; it is light, is carried on the girth of bag or basket by means of a hook or spring. When required for use, grasp the handle and detach from the girth; the net then slides down the handle and automatically fixes itself. By giving the screw at the end of the handle about three turns, the ring and net can be removed from the handle for packing up.

Complete, with Waterproof Net, 17/6 each. Parcel Post, 6d.

Orders by post receive immediate attention, and in all cases letters and orders are promptly acknowledged.

TROUT WADING NET.

This Landing Net is much the lightest and handiest for the purpose it is intended. It can be securely fastened to the Girth by the clip, as shown in diagram, and as easily released when required for use.

The size considered most useful is 2 ft. 6 in. in length, and the ring 10 in. to 12 in. across. The weight would be from 6 oz. to 7 oz.

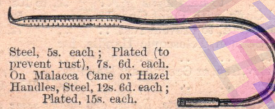

Price, 8s. 6d.; postage, 3d. extra.

GAFF (to screw on handle).

Steel, 5s. each; Plated (to prevent rust), 7s. 6d. each.

GAFF (to lash on handle).

Steel, 5s. each; Plated (to prevent rust), 7s. 6d. each. On Malacca Cane or Hazel Handles, Steel, 12s. 6d. each; Plated, 15s. each.

DOUBLE FOLDING MINNOW TRAP.

This is considered to be the most effective form of trap for catching minnows. It is made of Tanned Twine Netting mounted on a metal frame, with an opening at each end for the minnows to enter. They are attracted by bunches of red worsted tied inside. The trap collapses into a very small compass when not in use.

TACKLE

THE "KELSALL" PRAWN TACKLE.

HOW TO BAIT TACKLE.—The point of the needle to be inserted just below the tail and brought out at the middle of the breast, one hook of each of the two large triangles inserted in body of prawn as in diagram, and to be made fast to tackle with two small elastic bands or red silk.

Mounted on Single or Treble Gut,
1s. each.

Traces extra (see page 28).

Lead Wire 1s. per hank.

THE "DEE" PRAWN TACKLE

The tackle is baited with a needle as in tackle above; it has, besides the two treble hooks in the breast, a treble hook inserted in the back, just where it is so frequently bitten out by Salmon; it thus overcomes a difficulty so long felt.

Mounted on Single or Treble
Gut, 1/6 each.

Traces extra (see page 28).

Lead Wire 1s. per bank.

SHOTTED "DEE" PRAWN TACKLE.

WALTER FARQUHAR, Esq.'s, Pattern.

TACKLE.

TACKLE BAITED.

The shots are placed between the two Trebles as in illustration; Hooks, Shots, and Whippings are painted red, the colour of a boiled Prawn.

Mounted on Single or Treble Gut.

1/6 each.

Traces extra (see page 28)

**PRESERVED PRAWNS.**

A large assortment of selected Prawns in stock. Kept in 1 dozen, 2 dozen, and 3 dozen bottles, any quantity of which can be sent by Parcels Post.

THE "MACKENZIE" PRAWN TACKLE.

Invented by AUSTIN MACKENZIE, Esq.

The point of the needle is inserted just below the tail, and pushed through the fleshy part of body; the tackle is then fixed by two red rubber bands, one midway, the other at the head.

On Twisted or Single Salmon Gut, 1s. 6d. each.

Rubber Bands, 1s. per box.

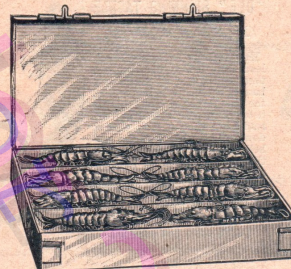

Preserved Prawns kept in stock.

THE "FACILE" PRAWN TACKLE.

The Prawn in this Tackle is baited quite opposite to the usual way; the needle point is inserted in the **breast**, and forced up. The Tackle can be made with one large hook, or with two medium hooks, as illustrated. After fixing Prawn on Tackle, bind up with fine copper wire, which makes the Prawn quite secure.

Price of Tackle, 1s. each.

Card of Copper Wire, 1s. each.

PRAWN BOX.

Made of Japanned Tin, Black outside, White inside, divided to take eight Prawns on *Tackles* for immediate use, a great convenience when so much fishing impedimenta has to be carried. Designed by a thoroughly practical Salmon Angler.

Size.	Inches long.	7 inches.
"	" wide.	5 1/2 "
"	" deep.	1 1/2 "
Price	6/6
Smaller size, 5 1/2 in. long, 4 1/2 in. wide, 1 1/2 in. deep.		
Price	4/-
Post, 3d. extra.		

TACKLE.

"DEE" SPINNING TACKLE

(For Salmon and Trout).

How to BAIT TACKLE—Detach lead from tackle, pass the gut through the bait by means of a baiting needle, introducing it at the vent of the bait, and bringing it out at its mouth, then slip the lead down the gut, and push it down into the bait's throat and belly, drawing up the hooks until the bait is curved in position shown.

1s. each.

Traces extra (see page 28).

TACKLE BAITED.

PRESERVED BAITS.

Preserved in a new preparation, whereby the natural brilliancy is maintained; the skin is also toughened. Will keep for 12 months. The Bottles have patent stoppers, which keep them perfectly airtight. One or more can be removed and stopper replaced in a few seconds.

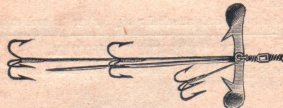

Minnows for Trout Spinning,
1s. per doz.
Small Dace or Gudgeon, suitable for Salmon, Bottles of 1 doz., 2 doz., or 3 doz., price 2/6 per doz. Postage 6d. each.

Whitebait for Salmon, 2/- per doz.
For Pike, large Dace, or Gudgeon, 2/6 doz.

THE "ARCHER" TACKLE (PATENT). TACKLE BAITED.

These are mounted specially by ourselves.

The most simple form of tackle for the dead natural bait. Largely used for Salmon, Trout, and Pike.

1/6 each.

Salmon size are mounted with extra strong Hooks, 2/- each.

DIP MINNOW HOOKS (ON GUT).

They are made in various sizes, diagram medium size, 4d. each.

TROUT WORM HOOKS.

With bristle, to keep them in position; they are made size and smaller, on fine

worm in position; of diagram, larger gut.

1s. 6d. per dozen.

"HOG" BACKED FLY SPOON.

These Spoons have been found most deadly for Trout, Perch, Mahseer, Mackerel, &c. They are made of light metal, the hook eyed, and attached to a solid ring, thus combining lightness with strength. They can be used with an ordinary Fly Rod.

The illustration is exact size, and we keep them also in a smaller size, 1s. each.

Traces with two swivels attached ready for use, 1s. each extra.

THE "MAGNET" SPINNER.

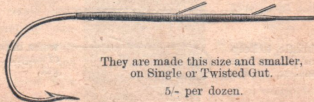

The joint invention of Messrs. MORRALL & STARKLEY.

Most deadly for Trout and Perch. They are Silver in colour, and are made with Red Tails, and Orange Silk Tag; both have proved very killing. 1s. each.

SALMON WORM HOOK.

With two Bristles, to keep the worms in position.

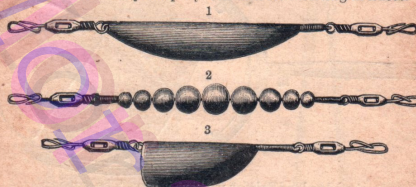

They are made this size and smaller, on Single or Twisted Gut.

5/- per dozen.

FARLOW'S IMPROVED SPINNING LEADS.

With Hook Swivel at each end.

These Leads are principally intended for inserting in traces.

The above Leads are made in various sizes; the diagrams are the medium sizes, price 6d. each.

SPINNING ALEXANDRA.

They are made in two sizes for Trout, size of illustration, and one size larger.

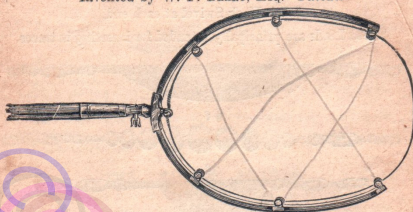

Price, 1s. 6d. each; suitable Trace, 1s. extra.

Larger, for Salmon, 2s. each; Trace, 2s. 6d. and 4s. each extra.

Orders by post receive immediate attention, and in all cases letters and orders are promptly acknowledged.

THE "BEART" SALMON LANDER.

Invented by W. F. BEART, Esq.—Patent.

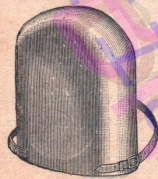

Designed to land Salmon without injury. The loop is placed over the tail, and when in position is jerked rapidly inwards, the action of which disengages the wire (which will be seen is held by projecting spiral springs), and so tightens on the thick part at tail end, which must be kept firmly held; the fish is thus powerless, and can be landed with ease. Has been used in Norway and Scotland with great success.

£1 10 0 each.

KNEE PAD.—FARLOW'S.

Made from "Para" Rubber.

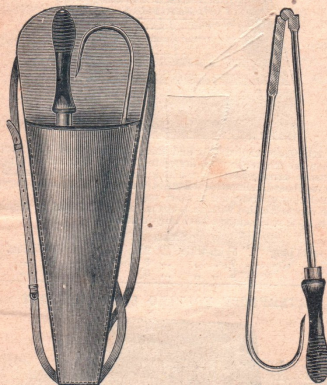

This "Knee Pad, made of the best Para Rubber procurable, is decidedly the most perfect Knee Protector yet made. The formation of the Pad so protects the knee that it has overcome the objection to most Knee Pads, and the material being genuine "Para" Rubber, remains soft and resists dampness.

5/- each. Post 3d. each.

FOLDING STEEL GAFF.

With Sling and Carrier.

Invented by the Right Honourable Sir HERBERT MAXWELL, Bart., M.P. Registered No. 500,746.

A very portable and convenient Gaff for Gentlemen who prefer to Gaff their own fish; is carried in a Leather shield slung over the shoulder, without inconvenience; can be easily attained when required; is made of the best material and workmanship.

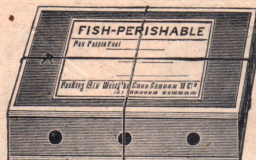

Length of Gaff when folded 18½ Inches.

" " open 36 "

Price complete. £2 10s. each.

FISH BOXES (Reg. No. 195,506).

FOR DESPATCHING FISH BY PARCEL POST.

We anticipate Anglers will find these boxes a great boon, as our attention has frequently been drawn to the want of a suitable, light, inexpensive arrangement for packing Trout in. They are made of strong cardboard, collapsible when not in use, and answer the purpose for which they are intended in every way.

Each Box is labelled with an address form; also cord is attached to tie it, so that the stamps have only to be added.

SIZES.

11 in. long	...	5½ in. wide	...	2 in. deep	...	5/- dozen.
14 "	...	7 "	...	3 "	...	6/- "
17 "	...	8 "	...	3½ "	...	7/6 "

WATERPROOF FOLDING SEAT CUSHIONS.

Size 12½ by 8½ open.	Size 14 by 10½ open.
" 6½ by 4½ folded.	" 7 by 5½ folded.

FOLDING.

These Cushions are invaluable to Anglers for sitting or kneeling upon. They are very light, and can be easily carried in the pocket or basket.

1/6 and 2/- each; Postage 2d. extra.

FISH MOUNTING A SPECIALITY.

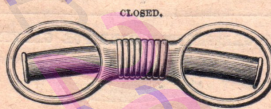

Having made arrangements with one of the best Naturalists in this country, who excels in fish mounting, we can guarantee this work being done in the very best manner and finish.

They take about two months to set up, as it is most important that the skin should be thoroughly dry.

Price depends on size of fish and style of case.

FOLDING SCISSORS.

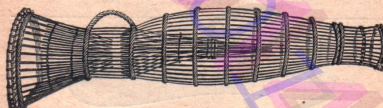

These are only kept in the best quality; the handles are made of German Silver.

CLOSED.

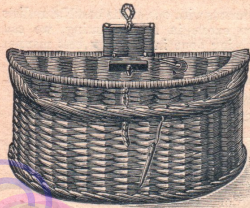

2s. 6d. each.

WICKER EEL BASKETS.

Baited with entrails, which are put in at the small end. The end is then covered with a piece of sacking or flannel.

Price, 6s. 6d. each.

WICKER BASKET for carrying Natural May Flies.

This Basket is made of wicker, and should be attached to a strap, which goes round the waist. It is intended to hold Natural May Flies for dapping or blow-line fishing, the large lid has a smaller one in the centre, the object of which is to remove a single fly at will, as they usually cling to the lid of the basket.

Price 5s. 6d. each.
Straps for ditto, 2s. each.
Postage 3d. extra.

LEADED GRASSHOPPER GRUB FOR GRAYLING.

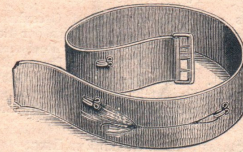

To the point of the hook stick half-a-dozen Gentles or a Grasshopper, and it is worked with a sink and draw motion near the bottom. 8d. each.

"PRIEST," for Killing Fish.

Made of Locust or Boxwood. The end is loaded with lead.
Price 3s. 6d. each. Postage 3d. extra.

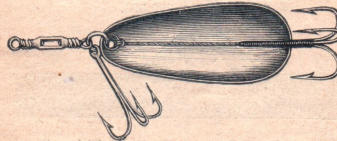

FLY HAT BAND.

Invented by the late FRANCIS FRANCIS, Esq.

Fly Hat Bands 1s. and 2s. each.

Extract from *A Book on Angling*, by FRANCIS FRANCIS, Esq.
"I find it most convenient to wind my Cast round my hat, as it makes a larger coil and does not require soaking to take the turns out, and I find the Fly Hat Band, which I invented some years since and gave to Mr. Farlow, of great service, as spare and stray flies can be looped on and safely stuck into it without damage to gut or hook point, and when it is not wanted the band can be taken off and put loosely away."

SALMON SPOON, with Flyviner Triangle.

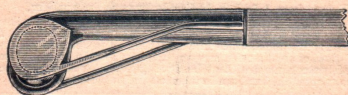

Silver, and Silver and Copper.
1½ in., 2/-; 2 in., 2/6; 2½ in., 2/6; 2½ in., 3/-; 2½ in., 3/6; 3 in., 3/6.
Gold and Silver.
1½ in., 2/6; 2 in., 3/-; 2½ in., 3/-; 2½ in., 3/6; 2½ in., 4/-; 3 in., 4/-.
This form of Spoon, with flying tackle, is now largely used in Norway for Salmon. It more effectually hooks and holds the fish than the old form of mounting, which frequently pricked the fish, and, the leverage being great, very often worked out.

SUPERIOR QUALITY SEA ROD.

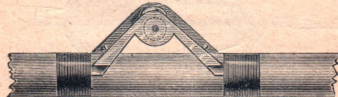

Two or Three Pieces.

These Rods are made of the best Greenheart, with Universal Winch Fittings, and fitted with our Registered Brass Roller Guard End Ring; also our Registered Brass Roller Guard Butt Ring and Phosphor Bronze Revolving Rings throughout. These Rings are made so that there is no possibility of the line catching or getting entangled, thus avoiding a fault found in most Rings on Sea Rods. Sea Rod £2 each. Rubber Button 2/6 each.

BRASS ROLLER GUARD END RING.
Reg. No. 309,597.

BRASS ROLLER GUARD BUTT RING.
Reg. No. 309,598.

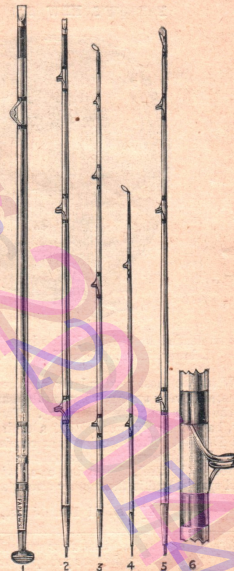

John Bickerdyke in "Letters to Young Sea Fishers," writes—
"The only novelty in rod fittings I have met with, besides those already mentioned, is an admirable roller or sheave butt ring, brought out recently by Farlow & Co.; it is one of the lightest and most practical I have yet seen, and is a great improvement."

All orders must be accompanied with a remittance or reference in town.

THE B.S.A. COMBINATION SEA AND PIKE ROD.

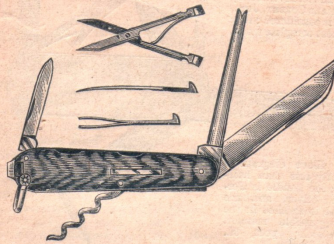

Made of selected Greenheart, Phosphor bronze upright guard rings, sheave roller butt ring, and the No. 5 stop that fits in butt has a roller head ring for sea work; the other tops have phosphor bronze revolving head rings, double brazed fittings, and brazed stoppers. With Nos. 1, 2, 3 pieces it makes a useful Pike Rod, 11ft. long, and good for pier work, with light leads. With Nos. 1, 2, and 4 pieces a medium stiff rod for ordinary weights and general sea work, 9ft. 9in. long. With Nos. 1 and 5 pieces a really good Sea Rod for boat work, 7ft. 6in. long. Fitted with Rubber Button and Division Bag, £2 5s. each.

No. 6 shows the kind of ring used on these Rods.

FARLOW'S SEA LEDGER,
Fitted with Kirby's Patent Straightpull Triple
Action Swivels.
For attaching to the lower Boom of a Sea Paternoster.
Mounted on Twisted Gut. Price 1/6 each.
Boom 6d. extra, Leads 4d., 6d. and 9d. each.

FARLOW'S REGISTERED KNIFE (No. 193,607).

The above Knife contains 1 large and 1 small Blade, Disgorger, Scissors, Stiletto, Tweezers, Corkscrew, and Screwdriver.

Price 21s. each, postage, 3d. extra.

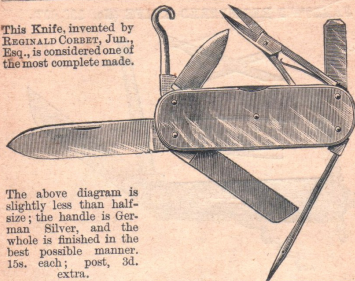

TELESCOPIC GAFF (for Salmon or Pike)

Length, when closed, about 15 inches, when drawn out, about 36 inches. The steel part is Nickel Plated, and is our own manufacture.

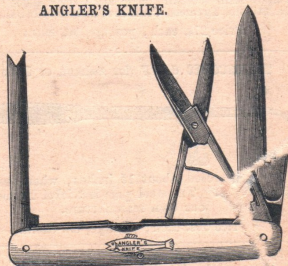

Price 30s. each; postage, 3d. extra.

Orders by post receive immediate attention, and in all cases letters and orders are promptly acknowledged.

This Knife, invented by REGINALD CORBET, JUN., Esq., is considered one of the most complete made.

The above diagram is slightly less than half-size; the handle is German Silver, and the whole is finished in the best possible manner. 10s. each; post, 3d. extra.

ANGLER'S KNIFE.

The above diagram is half-size, and represents the most convenient form of knife made, 6s. 6d. each.

TACKLE.

(Recommended by H. Cholmondeley-Pennell, Esq., in "Badminton Library.")

3 joint light Salmon or Grilse Rod, made of Greenheart, 13 feet 6 inches, with 2 tops, snake upright rings, and India-rubber Knob, with top case	55s. each.
4 inch Pennell Reel	40s. 0d.

Duke of Beaufort's addition to the above List. — Beaufort Moth, 1s.; Silver Wilkinson, 2s.; Black Fairy, 1s. 3d.; Critchley's Fancy, 1s. 3d.; Lemon Tipped Grey Monkey, 1s. 3d.; Green Grouse, 1s.; Blue Jay, 1s. each.

Latest Editions of "Badminton Library on Fishing," and other works, by H. Cholmondeley-Pennell, Esq., kept in stock.

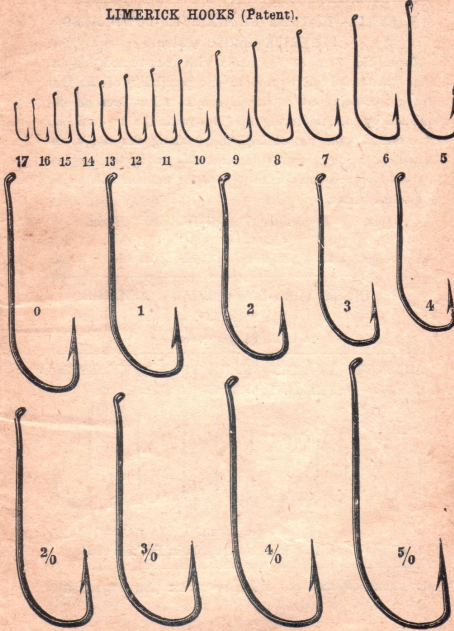

Orders by post receive immediate attention, and in all cases letters and orders are promptly acknowledged.

TACKLE.—*Continued.*

(Recommended by H. Cholmondeley-Pennell, Esq.)

[illegible]

All orders must be accompanied with a remittance or reference in town.

PENNELL—UP-TURN SHANK TURN-DOWN EYED
LIMERICK HOOKS (Patent).

From No. 7 to 50 are made with "re-turned" Eyes. The "re-turned" Eye prevents any possibility of the Gut fraying or being cut at the Eye. This has been accomplished by manufacturing the Eye with the tapered end "re-turned" (or turned backwards) along the shank, instead of being abruptly finished off, as in the original pattern. These are much the best for Salmon and Grilse Flies in all sizes.

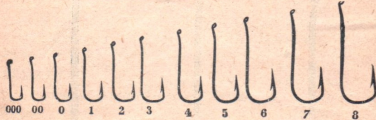

Prices of Re-turned "Pennell Limerick" Hooks.

5/0	4/0	3/0	2/0	1/0	1 to 7
2s. per doz. . .	2s.	1s. 9d.	1s. 6d.	1s. 6d.	1s. 3d.

Russian Leather Dubbing Books, fitted with a choice assortment of materials for making Salmon Flies, complete, £10 each.

SALMON FLY MATERIAL BOX.

Japaned Tin, black outside, white enamel inside. The lid is divided into 48 parts, for holding wools. It has a perforated cover, to prevent the colors from getting mixed and also to facilitate small quantities being taken out by a stiletto. Open space at bottom of box 2 inches deep for keeping books, &c.

One Tray, 1 inch deep with five spaces, for feathers, &c. Top divided as in illustration. Size, 12½ inches long, 8½ inches wide, 5½ inches deep. Lock and key, and handle to carry. Price, £2 10s. each.

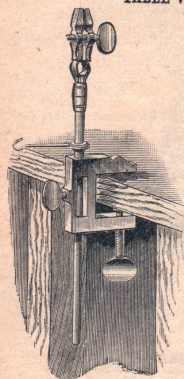

WIRE HACKLE HOLDER.

1s each.

The "Marryat" Bull-dog Pliers, 4/6 each; Plated 5/6 each.

TABLE VICE (Plated).

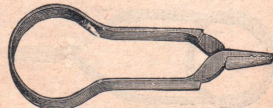

Other patterns:
5/-, 10/-, and 12/- each.

The 12/- quality is
nickel-plated, a really good
Vice,
and strongly recommended.

To prevent rust, best make,
20s. each.

HACKLE HOLDER.

Solid Steel, 2s. 6d. each; Plated, 3s. 6d. each.

IMPROVED "CHAPMAN" SPINNERS.

TACKLE.

TACKLE BAITED.

1½ in.	2 in.	2½ in.	3 in.	4 in.	5 in.	6 in.
2/-	2/-	2/-	2/-	2/6	2/6	3/-

The measurements are from the top of the fish (where the swivel joins) to the end of wire.

The three smaller sizes are mounted on Single Gut; the larger sizes on Single Salmon, Twisted Gut, or Gimp.

The "Chapman" Spinner is strongly recommended where the dead natural bait is used, being easily manipulated, and avoiding the use of a lead on the trace.

* For Preserved Baits see page 27. Price, 2s. 6d. per dozen.

FARLOW'S IMPROVED LEAD.

We keep the above leads in all sizes.

These leads are strongly recommended, as they prevent the line from kinking, and can be easily attached or removed at discretion. The ends being pointed enables it to cut through the weeds without opposition, which is a great advantage.

9d. each.

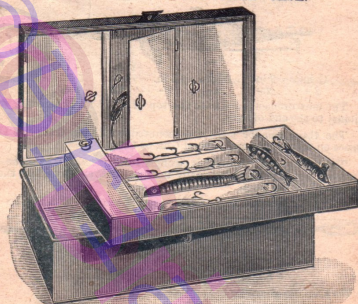

FARLOW'S "ANTI-KINKER."

The "Anti-Kinker" is intended to be placed between the trace and line. It is quite effectual in preventing the line from twisting or kinking in trolling, where a lead on the trace is not required. The "Anti-Kinker" is quite light, being made of zinc, and painted a neutral colour.

1/- each.

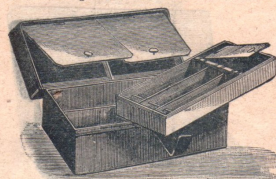

JAPANNED TIN TACKLE CASE.

The Bottom part is divided in three; two spaces are each 9½ in. long, 3½ in. wide, 1½ in. deep; the other space 6½ in. long, 2½ in. wide, 1½ in. deep. The lid is divided in three, for traces, &c. 12½ in. long, 6½ in. wide, 3½ in. deep, outside measurements. Price £1 2s. 6d. Has a Handle at back to carry it by; can also be secured by a Padlock.

Postage 3d. each extra. Bottom of size 1 only one partition.

LEATHER CUP AND STRAP.

For holding the butt end of rod, the pattern kindly given us by E. Oakley, Esq., who has fished the "Alten" river in Norway with great success. It is made of the best leather procurable. The Cup has a supporting frame of metal, which so strengthens it that, for the heavy work these are intended, is indispensable. 12s. 6d. each.

THE "EXPANDING" JAPANNED TIN TACKLE CASE.

When open all the Trays are exposed to view, as in illustration. The Box when expanded is supported by a false back. When closed it is most compact. Handle on lid to carry it, also Hasp for Padlock.

9½ inches long, 5 inches wide, 6 inches deep.

Top Tray 1½ inch deep, middle Tray 1 inch deep.

Bottom of Box 3 inches deep, Lid to hold Traces, &c.

Top Tray for Artificial Baits and Flights, Middle Tray for Baits, &c.

Bottom of Box, Winch, Spare Lines, Leads, &c.

21s. each. Padlocks (secret) or Key, 1s. 6d. each.

Orders by post receive immediate attention, and in all cases letters and orders are promptly acknowledged.

FIELD'S PATENT AERATING BAIT CAN.

THE PENNELL "PERFECT" SPINNING FLIGHT.

Reg. No. 260,952.

Method of mounting: Flanges should be opened, then lead pushed down through the mouth of bait into its belly, well down, so that the hooked flanges can be thrust through each side by the gill cover, as in illustration; one hook of middle treble should then be inserted in the back to give the bait a slight twist, as illustrated.

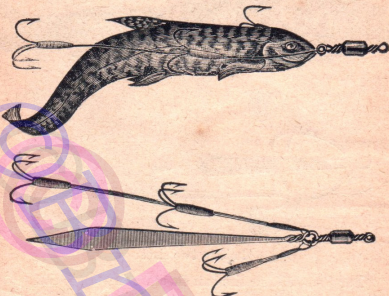

Price 2/6 each.

H

THE "BLACKWATER" SPINNING TACKLE.

For Colley or Minnow.

Invented by the Right Hon. Earl Cairns.

The blade or spear is made of copper flattened. In baiting the spear is forced down through the mouth, and one of the hooks of top treble on long flight is inserted just by the back. The blade can be bent as required at tail to get the wobble so much liked.

1s. 6d. each.

All orders must be accompanied with a remittance or reference in town.

PATENT TRANSPARENT SOLESKIN PHANTOM.

Highly recommended for Salmon, and has had great success in Norway.

Section of Head. Patent combination Swivel.

These Phantoms are made of selected Transparent Sole-skin, weighted inside with lead, which is silvered, and so gives the bait a most natural and effective appearance. They are each fitted with the patent Combination Swivel, as shown in diagram, which is made on the ball bearings principle, so that there is almost no friction.

"PHANTOM DEVON" BAIT (Patent).

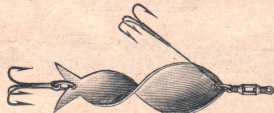

These Baits are in appearance the same as Phantoms, but have the advantages of the Devon Bait, being able to slip up the mount directly a fish is hooked. They also avoid a great defect in the ordinary Phantom—that is, the side hooks, which so frequently get injured and affect the spin.

Sizes—Inches: 2 2½ 3 3½ 4 4½ 5 5½ 6

3d. each to 6d. each, according to size.

"PIKE" LIVE BAIT PATERNOSTER SNAP TACKLE.

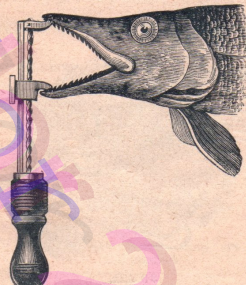

Complete, fitted with
"Kirby's" Patent
Straight-Pull Boom.

These are made of 1 yard single Salmon Gut, and can also be of Twisted Gut or Gimp. Loop 18 inches of Trout Gut to the end loop of the Patent Boom, to which attach the lead, the object being if it should get "hitched up" and fixed fast to any obstruction, you have only to use sufficient strain to break the fine gut, and all you lose is your plummet; then at the other loop of Patent Boom attach the single hook of square bend, as illustrated. A 4½ inch live dace is recommended carefully hooked through both lips, lower lip first. For method of using, see Badminton Volume on "Pike and other Coarse Fish."

Single Salmon Gut	Each.
Twisted Gut	3/-
Gimp	2/-
	1/6

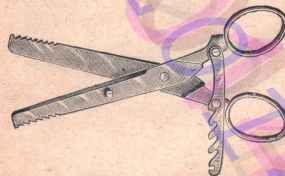

THE "JARDINE" GAG (Patent).

Price, 7s. 6d.; post, 3d. extra.

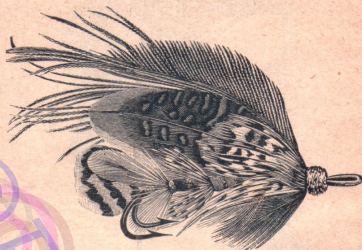

PIKE SCISSORS.

Made specially for us, and nickel-plated to prevent rust.

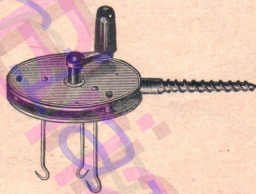

Price, 6s. 6d.

"PIKE" FLY.

3/6 each.

GUT TWISTING ENGINE.

Price 8/6 each; Postage, 3d. each extra.

PIKE DISGORGER AND CASE FOR BAITING NEEDLES.

Made of brass, and will carry 6 Baiting Needles.
Price 2/-; with Needles, 3/-.

BICKERDYKE PRIEST.

5/6 each.

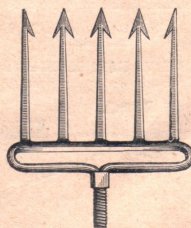

DOUBLE WIRE SPRING HOOK SWIVEL.

2/6 per dozen.

The diagram is the medium size; they are made larger and smaller.

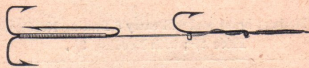

STEEL FISH SPEAR.

They are made with 3, 5, and 7 prongs, price 2/6 each prong.
Handles with sockets for Spears, 5/- and 7/6 each.

BICKERDYKE'S PATERNOSTER LIVE BAIT SNAP TACKLE.

ON GIMP OR RUSTLESS WIRE.

BAITED.

On fine Gimp, 6d. each.

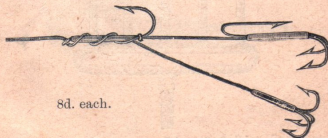

Fitted with 1 yard of Single Salmon Gut, Lead and Tackle complete. 2/3 each.

Bickerdyke's Leger, 1 yard Single Salmon Gut, Bullet, Gimp, Swivel, and Tackle complete, 2/6 each.

"Fishing Gazette" Floats, 6d. each; Small Pilot Floats, 2d. each.

BICKERDYKE'S LIVE BAIT SADDLE SNAP TACKLE.

ON GIMP OR RUSTLESS WIRE.

8d. each.

All Books on Angling kept in stock, see page 147

JARDINE'S LIVE BAIT SNAP TACKLE.

On Gimp, with adjustable Hook.

Price 6d. each. Gimp Traces, with Lead and Swivel for ditto, 6d. each.

Treble Twisted Gut, ditto, ditto, 1s. each.

PENNELL'S LIVE BAIT SNAP TACKLE.

On Gimp, with adjustable Lip Hook.

Price 6d. each. Gimp Trace, with Lead and Swivel for ditto, 6d. each.

Treble Twisted Gut, ditto, ditto, 1s. each.

FARLOW'S "FACILE" LIP HOOK (Reg. No. 139,246).

Invented by EMIL WEEGER, Esq.

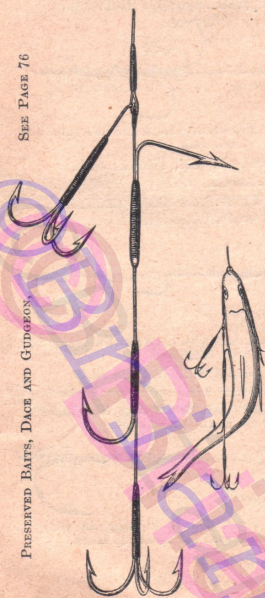

Can be slipped up or down, without injuring the Gimp or Gut, as is the case with the usual Lip Hook.

2s. per dozen.

FARLOW'S REGISTERED FLIGHT. No. 113,580.

SEE PAGE 76

PRESERVED BAITS, DACE AND GUDGEON.

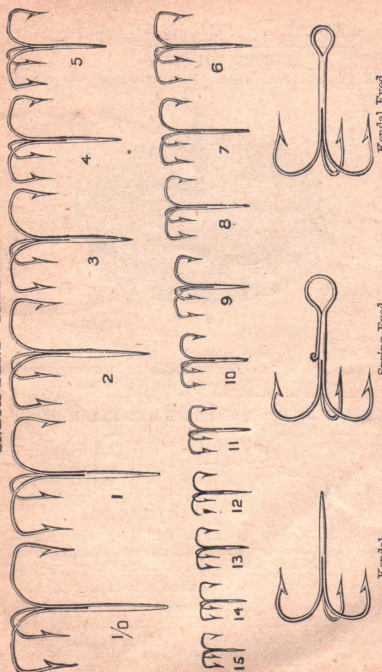

This flight, the joint invention of H. Cholmondeley - Pennell, Esq., and Albert N. Bromley, Esq., is suitable and strongly recommended for Salmon Trout, and Pike, has been used by many practical spinners, and is considered the most simple and perfect flight made.

Salmon size on single or twisted Gut, 1/3 each; Trout, 1/- each; Pike, 1/- each.

TO BAIT FLIGHT.— Pass the wire loop under the gill cover and bring it out of the bait's mouth, then put the single hook through the back, as shown in sketch, pull gently on this hook towards the head of bait, and when the tail assumes the curve you wish it to retain, stick the double barbed pin into the side and right through the bait. You then take the wire loop and pass it through the upper lip, or nose of the bait first, and the under lip second, and again under itself at mouth, thus forming a half knot, which never slips. They are made also with sliding as well as with fixed lip hooks.

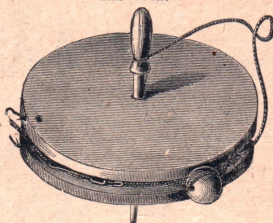

SNECK-BEND TREELES.

Size 1/0, per doz. 2/6; 1 to 15, per doz. 2/-, with or without eyes. Spring Eyed Treeles, per doz. 4/-

CORK TRIMMERS.

Fitted with 10 yards Plaited Hemp Line, Swivel, Buret, and Hook.

MAHSEER TACKLE.

We have given great care and attention to this department, having secured a large connection in India, and so obtained practical experience of what is required.

Customers can rely upon everything being of first-class quality.

All hooks, swivels, &c., are made of extra stout material suitable for this fishing.

We also keep the selections recommended by H. S. Thomas, Esq., F.L.S., Madras Civil Service (retired), in "Rod in India," 3rd Edition, 1897, which are executed in every detail to his instructions.

Post Office Orders and Cheques should be made payable to

C. FARLOW & Co., Ltd.

Bankers ... LLOYD'S BANK, Ltd.,
LAW COURTS BRANCH.

All orders must be accompanied with a remittance or reference in Town.

Orders by post receive immediate attention, and in all cases letters and orders are promptly acknowledged.

MAHSEER TACKLE.

(See pages 270 and 271 "Rod in India," 3rd Edition.

The following is a list of Tackle recommended by H. S. Thomas, Esq., in 3rd Edition "Rod in India" extract:-
 "So it has come about that though any tackle maker that you are accustomed to deal with *ought*, from the instructions in this book, to be able to supply you correctly. I am afraid few of them will, unless they have, or aim at having, a sufficient large and good connection of men who will be able to buy the tackle for you, and to give it by them for reference, and to give it the necessary study. If they will I have done all I can, in careful particularising of details, to help anglers to continue to deal with their old friends by helping their old friends to be able to give them satisfaction. If, therefore, your angler affections are already centred, I do not want to tamper with your long and tried friendship, will you be good to buy the tackle from Farlow. He first booked me with a proper Mahseer hook, and then stole my hook with one of his rods; and up to date they have continued to make such a speciality of Indian fishing that—well, I am afraid to say more lest I should be charged with favoritism, while, in brief, the one thought of my book is to aid the angler, in the most consistent manner, to get the proper tackle, and having the wrong tackle sent you out in India at such an irredeemable distance from your tackle shop!"

*1 Pliable but not top-heavy, rather light, salmon rod (not the stiff trolling rod that has been commonly called a Mahseer rod), four joint, greenheart, suction joints, winch fittings, with button-ended butt, partition bag, and extra fly top, 16 ft. Split cane, I am told, will not stand the climate, but I have not tried

With Phosphor Bronze Revolving Rings, 15s. extra.

*In addition to the Rod recommended by H. S. Thomas, Esq. many Gentlemen who do not mind length, prefer our 3 piece 16 ft. Greenheart spliced Rod, made specially for Mahseer, revolving Butt, and end rings, 2 Tops. £3 5s.

1 $\frac{1}{2}$ inch spoon	0 1 6

Total

Add 25 per cent. for freight, insurance, and any amount for loss by exchange ...

Rod Box.—Order the whole to be sent out in one stoutly-made hinged and locked box with your name painted on it. You will find such a box very convenient for keeping your tackle in, and for transporting it on your trips to the fishing grounds, occasions on which you will sometimes find a good lock an advantage.

Mr. Thomas also recommends that each joint, winch, &c., should have initials engraved upon them, as when two or more are on a fishing excursion there will be no mistake; you will always be able to pick out your own property at a glance.

MAHSEER TACKLE—continued.

For those who wish me to indicate a minimum economical kit, I will extract from the larger order the following:—

FOR MAHSEER.

1 Salmon rod as in the large order	£ s. d.
1 $\frac{1}{2}$ -inch winch	1 10 0
150 yards running line	0 7 6
2 Spinning traces of patent rust proof wire gimp No. 2/0	0 2 0
1 Double gut fly collar	0 1 0
2 Scoops of $2\frac{1}{2}$ inches	0 0 6
2 Richmond Spinners as in larger order	0 4 0
1 dozen No. 1 treble hooks uneyed	0 3 0
3 Yards patent wire gimp No. 2/0	0 1 0
2 Scoops of my one treble vent hook spinning tackle on wire gimp, No. 2/0	0 0 8
2 Baiting needles	0 0 2
2 Ten sinkers $1\frac{1}{2}$ inches	0 0 6
1 Blackmoor flies on No. 2	0 3 0
1 Skein silk	0 0 6

FOR CARNATIC CARP.

3 Blackmoor flies on No. 5 Limerick Eyed Hooks, my sizes	0 3 0
6 " " " No. 10 Kirby	0 1 6

FOR FRESH WATER SHARKS, &c.

Wire gimp as in the larger order	0 4 0
1 Richmond Spinner, trout size, as in larger order	0 2 0

FOR SMALL FLY TAKERS.

1 Fly rod	2 5 6
1 $2\frac{1}{2}$ -inch winch	1 1 0
30 yards running line	0 7 6
1 dozen black flies on No. 000 snecks	0 1 0
1 dozen duns	0 1 0
2 Ordinary fly collars	0 2 0

FOR LABEOS.

1 Labeo rod	1 10 0
1 Check winch 3 inches diameter	1 0 0
1 dozen No. 1 eyed Limerick hooks	0 1 3
1 Hank soft drawn lead wire	0 1 0
1 Detectable floats	0 1 6
10 yards fine tussa silk line	0 6 6
1 dozen lengths salmon gut	0 4 0
1 Plummet	0 0 2

Adding 25 per cent as above

Of this, any of the parts for different fish that are not desired can be omitted. But this is a highly limited order.
